# SEGUIREMOS TRABAJANDO PARA SER PARTE DE TU NEGOCIO

## CONTINUE WORKING TO BE PART OF YOUR BUSINESS

Cumplimos 45 años de fabricar productos desechables.

Dedicados a satisfacer las expectativas de nuestros clientes hemos recorrido un largo camino durante estos 45 años cumpliendo con la consigna de ser mejores cada día.

Nuestra recompensa se encuentra en el esfuerzo que ponemos día a día en fabricar nuestros productos con calidad, en sentirnos parte de su empresa, en darle solución a sus inquietudes, en cumplir con lo que el cliente espera de grupo REYMA.

Orgullosamente mexicanos, entregando nuestra pasión y dedicación, seguiremos trabajando para ser parte de su negocio.

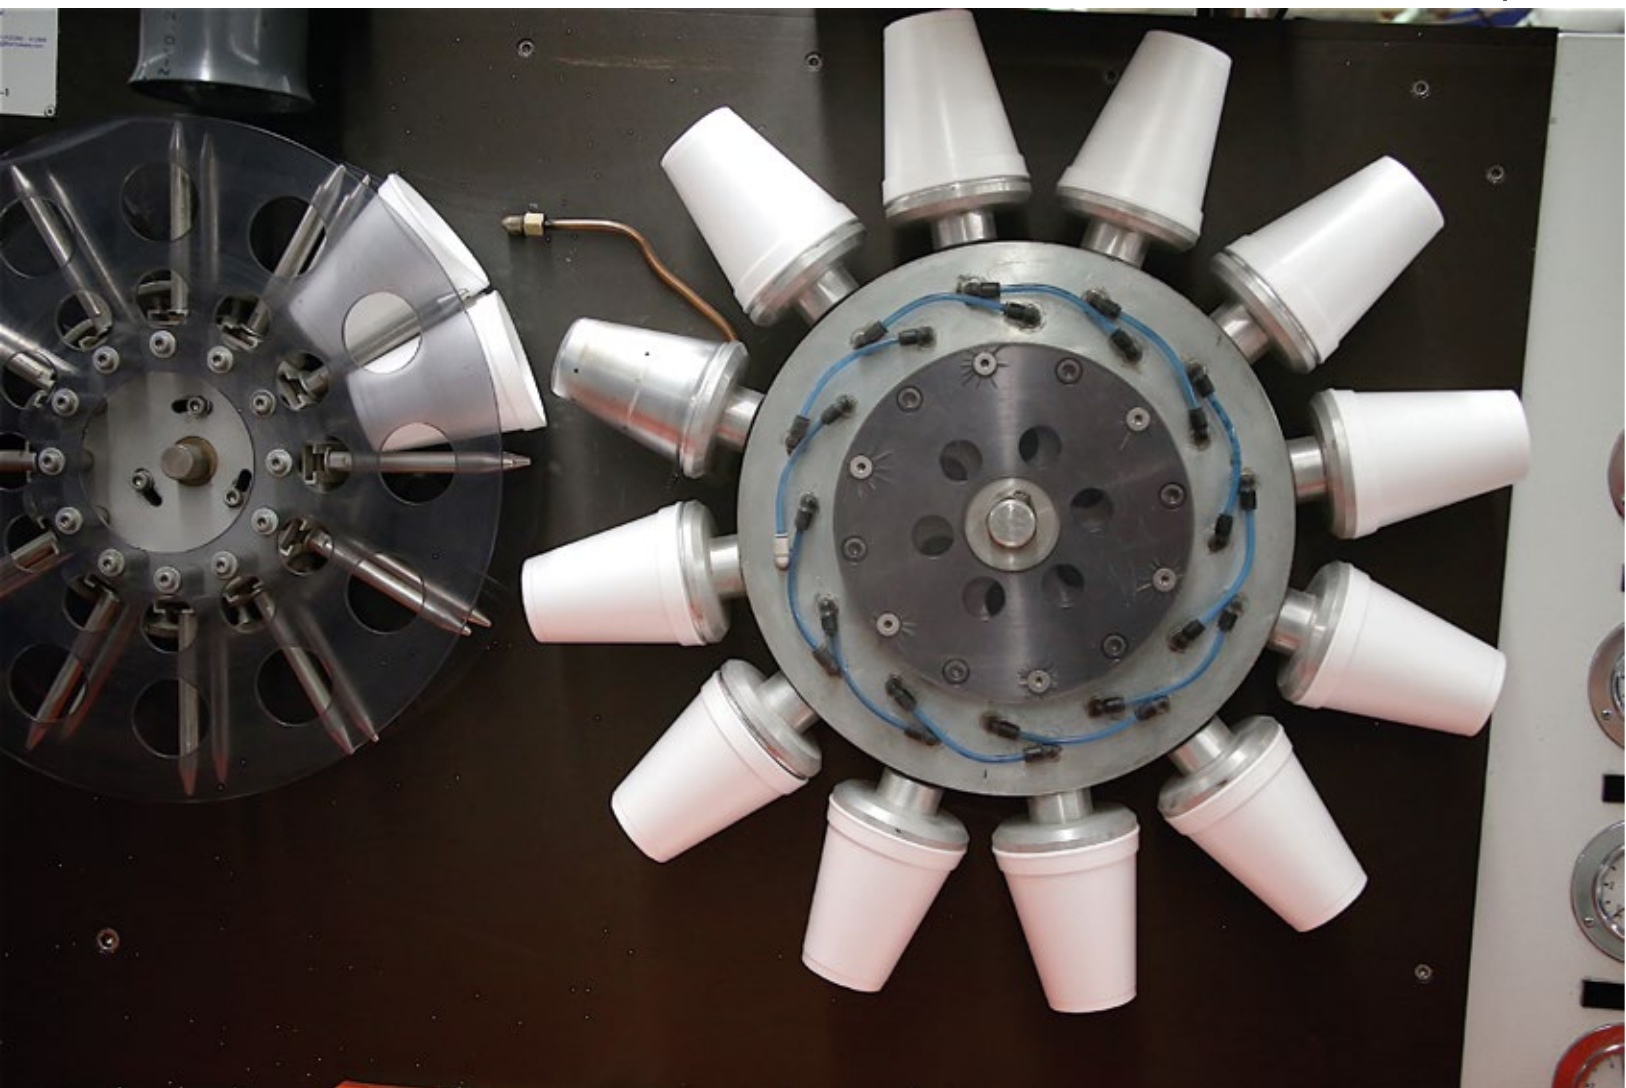

Reyma has manufactured disposable products for over 45 years.

We are dedicated to meet our customer expectations and have come a long way in compliance with the task of being better every day.

Our reward is our customer satisfaction, and we have it through the effort we put in every day making quality products and making the costumers feel that we are part of their business. REYMA Group is always committed to exceed goals.

Proudly Mexican, delivering our passion and dedication we will continue working to be part of your business.

SATISFACIENDO E  
INNOVANDO  
SATISFYING &  
INNOVATING

# NUESTRA HISTORIA

## OUR HISTORY

En 1970 inicia la historia de una magnífica empresa Mexicana, con la dedicación de un guanajuatense gustoso de trabajar y demostrar su empeño diario.

En grupo REYMA comenzamos labores como una microempresa conformada por 4 empleados, el apoyo familiar y una pequeña máquina que producía nuestras primeras bolsas de plástico.

Posteriormente, expandimos la producción y lanzamos

In 1970 begins the story of a magnificent Mexican company, with the dedication of a Guanajuato-born entrepreneur happy to work and demonstrate his commitment every day.

REYMA Group started as a small business with only 4 employees, family support and a plastic bag manufacturing machine.

Subsequently we expanded production and developed new product lines such as cups, trays, containers, stretch film,

al mercado nuevas líneas de producto como: vaso, charola, contenedores, película stretch, cubiertos, la línea de grado alimenticio: Clingfilm y actualmente BOPP polipropileno bioorientado.

Con nuestra destacada dedicación a través de los años nos hemos consolidado como la empresa mexicana líder en la producción, comercialización y distribución de productos desechables; reflejando en éxitos nuestra labor diaria.

Hemos posicionado nuestros productos hasta llegar a ser la marca preferida en todos los sectores en los que se consumen desechables; desde grandes cadenas de supermercados, hasta negocios pequeños.

cutlery, food grade line: Clingfilm and currently BOPP Biaxially Oriented Polypropylene.

With our outstanding dedication through the years we have established ourselves as the Mexican leader in the production, marketing and distribution of disposable products, reflecting on successes our daily work.

We have positioned our products to become the preferred brand in all sectors where disposable products are consumed from large supermarket chains, to small business.

# NUESTRO PRESENTE

## OUR PRESENT

En grupo REYMA, nos preocupamos por mantenernos a la vanguardia en cuanto a diseño, funcionalidad y calidad de nuestros productos, es por eso que contamos con un departamento de diseño y desarrollo encargado de ofrecer productos de acuerdo a las necesidades del mercado.

Generamos diseños creativos, innovadores y funcionales para el ramo alimenticio, además realizamos estudios de calidad, resistencia y ergonomía en cada uno de nuestros desarrollos plásticos.

Los productos desechables REYMA no transmiten olores o sabores, tienen cualidades higiénicas, no propician crecimiento bacteriano, son resistentes y de fácil manejo además previenen filtración y escurrimiento de líquidos.

**Nuestros productos están elaborados bajo los más altos estándares de calidad, para poder ofrecer a nuestros clientes la excelencia en productos.**

At REYMA group, we care about being at the forefront in design, functionality and quality of our products, that's why we have a design and development department responsible for providing products according to the market needs.

We generate creative, innovative and functional designs for the food sector, and conduct a number of studies in each of our plastic developments.

Our disposable products do not carry odor or taste, are hygienic not conducive to bacterial growth, are sturdy and easy to use, and also prevent leakage.

**Our products are manufactured under the highest quality standards in order to offer our clients an excellent product.**

Una de las principales ventajas de grupo REYMA, es la adaptabilidad. Satisfacemos las necesidades más específicas de nuestros clientes incluso entregando productos personalizados.

Gracias al ímpetu de toda la gente que trabaja dentro del grupo, hoy contamos con más de 5,800 colaboradores en nuestras seis plantas ubicadas en: León, Guanajuato; Ecatepec, Edo de México; Mérida, Yucatán; Apodaca, Nuevo León; Nogales, Sonora y Phoenix, Arizona; en las que fabricamos nuestras líneas de: charola, platos, vasos de polipropileno, térmicos, contenedores, popotes, bolsas y muchos productos más.

One of the main advantages of Reyma is adaptability. We meet the most specific needs of our customer, including the delivery of customized products.

Thanks to the impetus of all the people who work within the Group, we now have over 5,800 employees in our six plants located in: León, Guanajuato; Ecatepec, Edo de México; Mérida, Yucatán; Apodaca, Nuevo León; Nogales, Sonora and Phoenix, Arizona; where we manufacture our lines from trays, plates, cups, foam products, clear containers, plastic bags and more.

# SIEMPRE CERCA DE TI ALWAYS NEAR YOU

Contamos con 5 centros de distribución en México y uno en Phoenix, Arizona. Nuestra flotilla está compuesta por más de 450 trailers, esto nos permite atender las necesidades en el tiempo y forma de nuestros clientes.

We have five distribution centers in Mexico and one in Phoenix, AZ. Our fleet consists of over 450 trucks, this allows us to meet the necessities of our customers on time.

Tenemos presencia en todo el territorio nacional además en Estados Unidos, Centro América y El Caribe.

Estamos presentes en cada evento, cada festejo, celebraciones, en tus vacaciones y en cada momento importante de tu vida.

We have presence through Mexico, the southern part of the United States, Central America and the Caribbean.

We are present in every event, every celebration, in your holidays and every important moment of your life.

# MATERIALES

## MATERIALS

LOS PRODUCTOS QUE  
FABRICAMOS SON FÁCILMENTE  
RECICLABLES,  
ESTO LES BRINDA UN ALTO  
VALOR EN EL MERCADO COMO  
MATERIAL RECUPERADO.

THE PRODUCTS WE MANUFACTURE  
ARE EASILY RECYCLABLE  
THIS PROVIDES THEM HIGH VALUE  
IN THE MARKET AS RECOVERED  
MATERIAL

### ► POLIESTIRENO BIORENTADO (BOPS)

Brinda o proporciona una mejora a la apariencia del producto empacado, debido a su excelente brillo y transparencia, disminuye en gran medida la formación de niebla en productos frescos aún en alimentos con gran contenido de humedad. Al mismo tiempo preserva más frescos los productos.

Es un material muy liviano (ligero) y cuenta con excelente rigidez frente a otros termoplásticos, permitiendo utilizar espesores de pared más delgada, pero sin dejar a un lado la alta resistencia al rasgado, pinchaduras o rayado; también resiste a bajas temperaturas, es apto para ser exhibido en refrigeradores. Cuenta con una excelente estabilidad dimensional, es decir no le afectan los cambios moderados de temperatura y humedad relativa.

Sus propiedades químicas: no transfiere sabores u olores al producto que contiene, es inerte a soluciones acuosas, soluciones débiles ácidas o alcalinas, salmuera, soluciones jabonosas o con detergente.

### ► POLIETILENO DE BAJA DENSIDAD (PEBD)

Es uno de nuestros materiales con mayor versatilidad esto es gracias a que cuenta con una estructura muy simple, la más simple de todos los polímeros comerciales.

Es considerado un sólido con diferentes grados de flexibilidad (depende del espesor de pared del producto). Otra de sus principales características es que es ligero y un buen aislante eléctrico.

Mantiene alta resistencia al impacto, además de resistencia química y térmica moderada. Se puede procesar por inyección o extrusión. Cuenta con mayor flexibilidad que el polietileno de alta densidad. Su coloración original es transparente, aunque ésta se opaca a medida que aumenta su espesor. Al igual que el polietileno de alta densidad es 100% reciclable.

### ► BIAXIALLY ORIENTED POLYSTYRENE (BOPS)

Provides or improves the appearance of a packaged product, due to its excellent gloss and transparency, greatly decreases the formation of fog in fresh foods with high humidity. At the same time preserves the product's freshness.

It is a lightweight material and has excellent rigidity compared to other thermoplastics; allowing the use of lower thickness, but without leaving aside the high tear, puncture or scratch resistance, also resists low temperatures and is suitable to be displayed in refrigerators. It has excellent dimensional stability, not affected by moderate changes in temperature and relative humidity.

Because of its chemical properties it does not transfer any flavor or odor to the contained product, the materials are inert to aqueous solutions weak acid or alkaline solution, brine, or detergent soap solutions.

### ► LOW DENSITY POLYETHYLENE (LDPE)

It is one of our most versatile materials, this is because it has a very simple structure, the simplest of all commercial polymers.

It is considered a solid with different degrees of flexibility (depending on the product wall thickness). Another of its main features is that it is lightweight and a good electrical insulator.

Maintains high impact resistance, along with chemical resistance and moderated thermics. Can be processed by injection or extrusion. It has more flexibility than HDPE.

Its original color is transparent, but opaque as it thickens. Like the High Density Polyethylene, is 100% recyclable.

### ► POLIESTIRENO EXPANDIBLE (EPS)

Sin duda, los artículos producidos con este material forman parte de nuestros productos estrella, son extraordinariamente ligeros y al mismo tiempo resistente, debido a la refracción de la luz su color natural es blanco. Está diseñado para funcionar como el mejor aislamiento térmico.

El rango de temperaturas en el que este material puede utilizarse es alto y puede usarse con total seguridad sin que sus propiedades se vean afectadas, ya que es posible contener desde alimentos congelados hasta calientes.

Algunas otras características son que no absorbe ni acumula agua, tampoco altera su conductividad térmica y además mantiene su capacidad de aislación térmica en el tiempo.

Existen distintas medidas y espesores según las necesidades del usuario y no requiere protección especial para su manipulación.

### ► POLIETILENO DE ALTA DENSIDAD (PEAD)

Es ideal para contener y transportar diversos tipos de materiales gracias a sus características.

Es resistente al agua aun cuando ésta se encuentra en su punto de ebullición, contiene propiedades más flexibles que el polipropileno, además es excelente frente a ácidos, bases y alcoholes.

Los polietilenos de alta densidad, tienen una resistencia poderosa, son más duros, fuertes y ligeramente más densos que los polietilenos de baja densidad, la corrosión no representa un problema porque está diseñada para no ser atacada en ninguna parte de su composición.

Es 100% reciclable, lo que refrenda nuestro compromiso con el ciudadano del medio ambiente.

### ► EXPANDABLE POLYSTYRENE (EPS)

Undoubtedly, the articles produced with this material are part of our star products and are extremely light and yet durable, due to refraction of light, its natural color is white. It is designed to function as the best thermal isolator.

The temperature range in which this material can be used is high and can be used safely without their properties being affected. Since it is possible to contain from frozen to hot food.

Some other features are: it does not absorb or accumulate water, nor does it alter its thermal conductivity and also keeps its thermal insulation capacity over time.

There are different sizes and thicknesses according to user requirements and requires no special protection for handling.

### ► HIGH DENSITY POLYETHYLENE (HDPE)

Ideal for containing and transporting various types of materials thanks to its characteristics.

this material is waterproof even when it is in its boiling point, contains more flexible properties than the polypropylene and is excellent containing acids, bases and alcohols.

High density polyethylene, has a powerful resistance, is harder, stronger and slightly more dense than low density polyethylene, corrosion is not a problem because it is designed not to be attacked in any part of its composition.

It is 100% recyclable, which confirms our commitment to environmental stewardship.

#### ► POLIESTIRENO CRISTAL

Este material es de alto peso molecular lo que le permite ofrecer una amplia gama de posibles aplicaciones tanto en inyección como en extrusión. Este producto puede moldearse con facilidad permitiendo desarrollar formas y diseño innovadores.

Es transparente, rígido y presenta baja resistencia a temperaturas moderadas. Su claridad es única, lo que permite exhibir mejor su contenido.

Es insensible al ataque de hongos y microorganismos lo que le confiere un alto grado de confiabilidad para el empaque de alimentos.

#### ► CRYSTAL POLYSTYRENE

This material has high molecular weight, allowing you to offer a wide range of potential applications in both injection and extrusion processes. This product can be molded with ease to develop innovative shapes and design.

It is transparent, rigid and has low resistance at moderate temperatures. Its clarity is unique, allowing better display of contents.

It is insensitive to attack by fungi and microorganisms which gives a high degree of reliability for food packaging.

#### ► POLIPROPILENO (PP)

Este material es de baja densidad, comparte la propiedad de la transparencia del poliestireno cristal, permitiendo observar sin problema el contenido que lleva.

Gracias a su composición puede presumir una excelente versatilidad. Su dureza supera las más rigurosas pruebas y otra de sus cualidades es la resistencia a la abrasión.

Es totalmente reciclable, y su tecnología de producción es de menor impacto ambiental. Esta es una característica atractiva frente a materiales alternativos. Además los productos se fabrican con materia prima virgen, no transmite olores ni sabores a los alimentos ni bebidas.

#### ► POLYPROPYLENE (PP)

This material has low density, and shares the property of transparency like Crystal Polystyrene, which can easily observe its content.

Thanks to its composition this component is extremely versatile, its hardness exceeds the most rigorous testing, another quality of this product is the resistance to abrasion.

It is fully recyclable, and its production technology has the lowest environmental impact. This is an attractive feature compared to alternative materials. Also our Polypropylene products are manufactured with virgin materials, it does not transmit odor or taste to food or beverages.

### ► POLIESTIRENO ESPUMADO (PS)

Dentro del universo de productos REYMA, el poliestireno espumado posee cualidades térmicas superior a cualquier otro material.

Este producto es un excelente aislante térmico, no cambia su forma si se vierten productos a temperaturas menores a 90°C, y además es muy ligero.

Sin duda, la cualidad más destacada es su alto sentido de la higiene, ya que gracias a su estructura no construye sustrato nutritivo para microorganismos.

Si llega a tener algún imprevisto como una caída, no hay problema ya que cuenta con alta capacidad de absorción a los impactos.

### ► PVC

Una de las principales características de PVC es que puede transformarse en un material rígido o flexible, teniendo así gran variedad de aplicaciones. También cuenta con resistencia mecánica, al impacto y a la abrasión.

El uso de este material se emplea extensivamente donde la salud es una prioridad gracias a sus cualidades higiénicas.

Es un material excepcionalmente resistente, los productos de PVC pueden durar más de 50 años en buenas condiciones.

Es considerado como un aislante térmico y acústico. Es ligero impermeable al agua, y también destaca por su dureza.

Los componentes con que fabricamos nuestros productos de PVC son totalmente confiables lo que le confiere a nuestros productos un uso seguro al ser utilizados en contacto con alimentos, además de tener excelente resistencia química y mecánica, evitan la formación de niebla y brindan una buena apariencia del producto empacado.

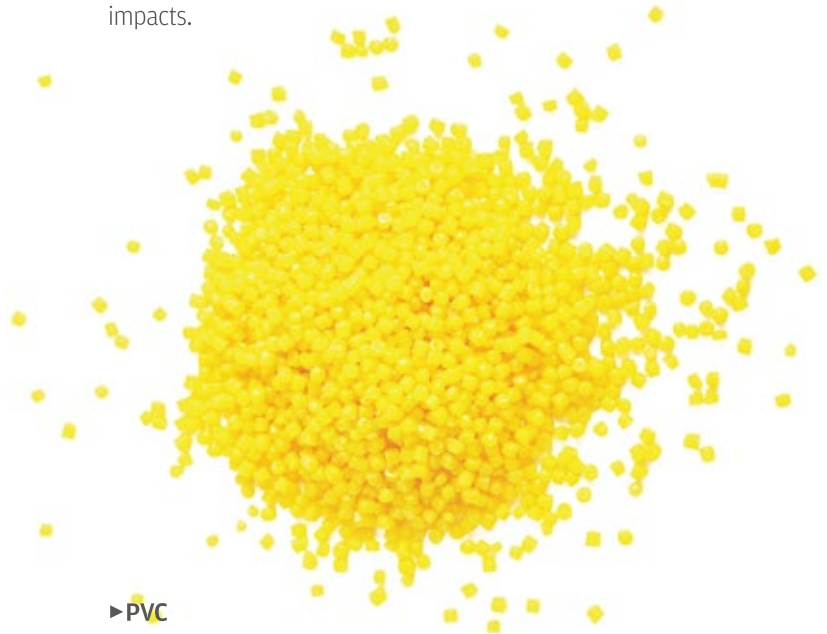

### ► POLYSTYRENE (PS)

Within the universe of REYMA products, polystyrene has superior thermal qualities than any other material. Another benefit of this product is that it's not toxic and it also has moisture resistance.

This product is an excellent thermal insulator, it does not change its shape if products at temperatures below 90°C are poured, it also very lightweight.

Without doubt, the most outstanding quality is its high sense of hygiene and thanks to its structure does not build nutritious substrate for microorganisms.

If something unexpected happens such as a fall, there won't be a problem because it has a high capacity to absorb impacts.

### ► PVC

One of the main characteristics of PVC is that it can be transformed into a rigid or flexible material, thus having great variety of applications. It also has mechanical strength and resistance to impact and abrasion.

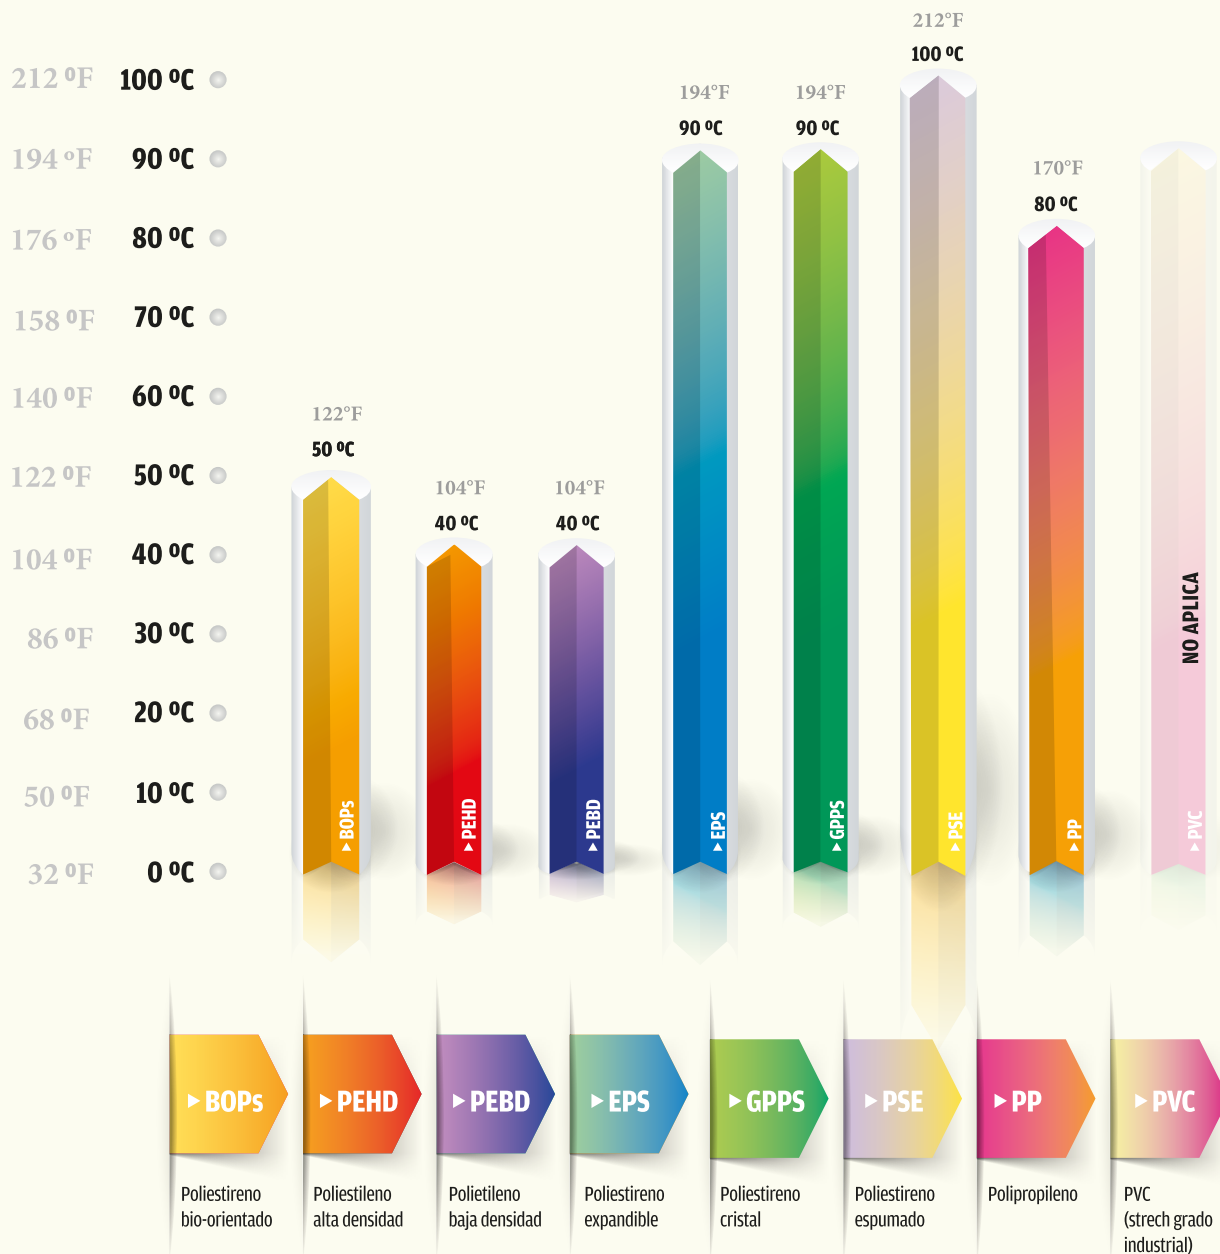

This material is used extensively where health is a priority because of its hygienic qualities. It is an exceptionally resistant material. PVC products can last over 50 years in good condition.

This material is considered a thermal and acoustic insulator. It is lightweight, waterproof and also notable for its hardness.

The components of our PVC products are completely reliable, giving our products a safe use when in contact with food, in addition to having excellent chemical and mechanical resistance, preventing the formation of fog and providing a good appearance to packaged product.

## ICONOGRAFÍA

### ICON LEGEND

# Cultura de la calidad y mejora continúa

## Culture of continuous quality improvement

### Todos nuestros productos se realizan bajo procesos amigables con el medio ambiente:

- Hacemos un uso eficiente de energía durante la fabricación de nuestros productos, lo que minimiza el impacto ambiental respecto a la producción de papel.
- Nuestros procesos están diseñados físicamente para optimizar el uso de las materias primas, lo que reduce significativamente el impacto ambiental.
- Nuestros productos se obtienen utilizando tecnologías de producción totalmente higiénicas y excelentes prácticas de manufactura.
- Aprovechamos la sinergia entre nuestros procesos y productos para optimizar el reciclado primario, por medio de procesos eficientes en la recuperación y reutilización de materias primas generando un mínimo de desechos sólidos y líquidos.
- Los productos que fabricamos son fácilmente reciclables, esto tiene un alto valor en el mercado como recuperado. Teniendo como consecuencia un ahorro considerable en costos de materia prima para fabricar otros productos con materiales reciclados.

### All our products are made under environmentally friendly processes:

- We make an efficient use of energy during the manufacture of our products, which minimizes the environmental impact regarding the production of paper.
- Our processes are physically designed to optimize the use of raw materials, which significantly reduces the environmental impact.
- Our products are made using fully hygienic production technologies and have excellent manufacturing practices. (esta no la pude poner en dos columnas porq se modificaba todo, para que la pongas igual en dos.)
- We take advantage of the synergy between our products and processes to optimize the primary recycling, through efficient processes in the recovery and reuse of raw materials generating a minimum of solid and liquid wastes
- The products we manufacture are easily recyclable. This has a high market value as recovered material. Taking as a result considerable savings in raw material costs to make products from recycled materials.

## Todas las resinas están certificadas ante la FDA (Food and Drug Administration)

All resins are certified to the FDA (Food and Drug Administration)

En Grupo REYMA estamos comprometidos con la mejora ecológica de nuestro entorno y del desarrollo sustentable de nuestros procesos, por medio de la optimización tecnológica y uso de maquinaria de punta que emplean materias primas de origen mineral.

Grupo REYMA comprometido con los más altos estándares de calidad, cuenta con la certificación ISO 9001:2008

Nuestras materias primas están certificadas por la FDA de Estados Unidos, que avala que nuestros materiales están garantizados para el contacto con alimentos.

Todos estos esfuerzos han permitido a REYMA incursionar en nuevos mercados, es el caso de las diferentes líneas de producto que actualmente se venden a clientes como Aeroméxico, Volaris, Wal-Mart, cadenas de supermercados e incluso mercados fuera de nuestro país.

At REYMA Group, we are committed to the environmental improvement and the sustainable development of our process through the technological optimization and cutting edge machinery that use raw materials of mineral origin.

REYMA group is committed to the highest quality standards and it counts with ISO 9001: 2008

Our raw materials have US FDA certificates, which guarantee safeness when in contact with food

All these efforts have enabled REYMA to enter new markets, our different product lines are being sold to new costumers such as: Aeromexico, Volaris, Wal-Mart, supermarket chains and even outside our country markets.
